

Hello!

I'm an experienced developer and architect presently exploring new opportunities to take my skills and knowledge to the next level that will allow me to further grow professionally and my clients to make their most ambitious dreams a reality.

Being a curious and investigative mind, a goal-oriented problem solver not shy of complexity, having over two decades of extremely versatile, successful and productive development experience, I'm fluent with many of the modern technologies, such as Python (Flask, Django), Go, JavaScript (Angular/TypeScript/Vue/React), Java, PostgreSQL. Some of my interests include NLP, Deep Learning, Agent Systems, Robotics, Mathematical Modeling, Identity Management, Bioinformatics, Biology.

If you'll find my experience somewhat relevant to your company's needs, please reach me back.
