Key Features

Semantic Search

Easily find relevant patient data across records with natural language queries, saving time and increasing efficiency.

Technologies used: NLP, ElasticSearch

AI-Powered Analysis

Use AI to uncover hidden patterns and insights within patient data, leading to more accurate predictions and decisions.

Technologies used: TensorFlow, Machine Learning

Integrated Medical Codes

Work seamlessly with standard medical codes such as ICD-10, CPT, and SNOMED to ensure precise billing, diagnosis, and reporting.

Technologies used: ICD-10, CPT, SNOMED

Meaningful Use Compliance

Ensure compliance with Meaningful Use regulations, improving healthcare quality through structured data and proper reporting.
